G-Tech Consulting, Inc.: Technology SPOTLIGHTS: Assistive Technology (AT)

We are a minority owned small-business information technology services firm headquartered in the Washington, DC metropolitan area. Our mission is to provide best quality and best value technology services to our clients.

G-Tech Consulting delivers meaningful solutions in the following Assistive Technology related areas:

- Implementing Section 508 Compliance requirements
- Creating Acquisition Plans that incorporate Section 508 Compliance Standards
- Providing standardized processes and templates to ensure due diligence with Section 508 Compliance
- Conducting accessibility audits and providing reports on agency compliance with Section 508 Law
- Implementing and providing research services regarding innovative Assistive Technology Products
- Providing on-site and web-based training in Section 508 and other Assistive Technology related products
- Offering Assistive Technology Help Desk Support

Assistive Technology refers to any item, piece of equipment, or system, that is used to increase, maintain, or improve functional capabilities of individuals with disabilities. In 1998 the US Congress amended the **Rehabilitation Act** to require Federal agencies to make their electronic and information technology accessible to people with disabilities. **Section 508** was enacted to eliminate barriers in information technology, to make available new opportunities for people with disabilities, and to encourage development of technologies that will help achieve these goals. G-Tech Consulting complies with federal regulations required by our customers to custom develop computer applications and graphical user interfaces (GUI's) that adhere to standards defined under Section 508.

G-Tech Consulting's aim is to increase access to assistive technology (AT) devices and services for individuals with disabilities and to facilitate the development of a consumer-responsive AT service delivery system. Our staff works with consumers, service providers, federal and state agencies, private industry, and other interested individuals to facilitate the development of standardized enterprise and nation wide AT services.
